

Joining the Locomotor Expertise and Rehabilitation Lab

Read through the projects presented on our [website](#). Most are ongoing projects that will take a least two or three semester for you to make a contribution. Please send an e-mail with the following information to [Dr. Sawers](#).

- Your name and contact information
- Your major, GPA (min 3.0 required, > 3.5 preferred), and expected graduation date.
- Courses taken and grades (or attach an unofficial transcript)
- A short essay (1-2 pages) on why you want to do research and some information on what kind of research you would like to do. For example, do you like testing equipment, working with people, writing, electronics, any previous research experience or projects, any work or volunteer activities you have had. If you could do anything in kinesiology, rehabilitation, engineering or another field, what would it be, (i.e. what would be the coolest project you could think of)? Give us an idea of something scientific that you read about and thought was interesting.
- Which projects are interesting to you? Why? Any comments or questions you have about the projects.
- Name of some references and contact information
- Anything else you would like to tell us about yourself

Now you are ready to email Dr. Sawers.
